**Subject: BMI ACR Plus**

BMI is pleased to inform you that our ACR Plus fittings for refrigeration are UL Certified to 700 psi operating pressures to support R410A and Sub Critical CO<sub>2</sub> Applications.

While our fittings are manufactured in accordance with ASTM/ASME specifications, this additional certification allows the use of higher-pressure refrigerants.

UL will only grant this certification after rigorous testing. The testing and certification validates the performance of these products to operating pressures of 700 psi at 250 °F. The certification is valid for all BMI ACR Plus Wrot Solder-Joint Pressure fittings 1/8 to 2 5/8 inches.

With the BMI ACR Plus product offering, you now have the highest quality certified fittings for your ACR needs.

Complete specifications may be found on the BMI website at:  
[http://www.bmicanada.com/products/bmi\\_specs\\_wrot\\_ACR\\_plus\\_copper\\_pressure\\_fittings.pdf](http://www.bmicanada.com/products/bmi_specs_wrot_ACR_plus_copper_pressure_fittings.pdf).

Please contact your BMI representative or contact our office if you require more information.
